

Typical Device Breakpoints

Supplemental Instruction

There are many of screens and devices with different heights and widths and it is very difficult to create an exact breakpoint for each device. To keep it simple, you may focus on these five groups:

```
/* Extra small devices (phones, 600px and down) */  
@media only screen and (max-width: 600px) {...}  
  
/* Small devices (portrait tablets and large phones, 600px and up) */  
@media only screen and (min-width: 600px) {...}  
  
/* Medium devices (landscape tablets, 768px and up) */  
@media only screen and (min-width: 768px) {...}  
  
/* Large devices (laptops/desktops, 992px and up) */  
@media only screen and (min-width: 992px) {...}  
  
/* Extra large devices (large laptops and desktops, 1200px and up) */  
@media only screen and (min-width: 1200px) {...}
```
